LOCAL NUMBER PORTABILITY

ATTACHMENT 7 – Local Number Portability

SECTION 1. Local Number Portability (LNP)

1.1 General

Frontier/Citizens will convert to LNP at its discretion, or after a Bona Fide Request is received from the Carrier. When a Bona Fide Request is received, Frontier/Citizens will provide portability in the requested central office in accordance with the processes set forth in 47 U.S.C. § 153 (30) and in the FCC's orders in CC Docket No. 95-116 and other orders addressing carrier LNP obligations. The technology that meets the FCC's performance criteria is Location Routing Number (LRN). LRN is currently being used by the telecommunications industry to provide LNP.

1.2 Terms and Conditions

Frontier/Citizens will only provide LNP as required by the Act and FCC rules and orders, and where applicable, state rules and orders governing LNP and the transition of services between local carriers. LNP shall apply only to the porting of telephone numbers with respect to a customer who has an active account (i.e., the customer has not been disconnected) and wishes to retain its telephone number while changing local carriers. Porting of customer telephone numbers will only be permitted within each specific customer's Frontier/Citizens rate center.

When LNP becomes available in the Frontier/Citizens switch, ISPNP will cease to be available and all existing ISPNP arrangements will terminate.

1.3 Obligations of Frontier/Citizens

Citizen will deploy LNP in the specified central offices at its discretion, or in accordance with the process set forth in 47 U.S.C. § 153 (30) and in the FCC's orders in CC Docket No. 95-116 and other orders addressing carrier LNP obligations. (See Exhibit A and B)

Frontier/Citizens will participate in LNP testing in accordance with North American Numbering Council (NANC) standards.

Frontier/Citizens will follow recommended National Emergency Number Association (NENA) standards for LNP until or as such time the standards are superseded by federal, state, or local legislation.

1.4 Obligations of Carrier

If Carrier requests LNP, Carrier is required to send to Frontier/Citizens a completed Bona Fide Request Form for LNP deployment.

Carrier is responsible to coordinate with the local E911 and Public Services Answering Point (PSAP) coordinators to insure a seamless transfer of end user emergency services.

Carrier is required to meet all mutually agreed upon testing dates and implementation schedules. Both Parties will perform testing as specified in industry guidelines and cooperate in conducting any additional testing to ensure interoperability between networks and systems. Each party shall inform the other Party of any system updates that may affect the other Party's network and each Party shall, at the other Party's request, perform tests to validate the operation of the network.

Carrier is responsible to meet all Number Portability Administration Center (NPAC) and North American Numbering Council (NANC) requirements and in providing its own access to regional NPAC.

Carrier is responsible for providing its own access to the Service Order Administration (SOA).

**LOCAL NUMBER PORTABILITY (LNP)
BONA FIDE REQUEST (BFR)
(Continued)**

Notes: 1 List each switch targeted for LNP by its specific CLLI code

2 Enter associated Rate Center information from LERG, including Rate Center Name and Associated V&H Terminating Point Master Coordinates,
Source of the LERG information: Destination Code Record (DRD) Screen

3 Circle or highlight Y if requesting all eligible NPA-NXX codes in that specific switch to be opened Circle or highlight N if only certain NPA NXX codes are being requested Then provide list of desired NPA NXX(s)

Note Targeting of specific NPA-NXX codes should be carefully considered A traditional ILEC may serve a single rate center with multiple switches (CLLIs and NXX codes) while CARRIER may serve multiple rate centers with a single switch In the latter case, use of a specific NXX code will determine the rate center
